## B. Supervision by a scientist external to the Biozentrum

Scientists external to the Biozentrum can supervise a Master thesis in Molecular Biology, with a full-time professor of the Biozentrum as a responsible secondary supervisor. External supervisors require a professorship, *venia docendi* or comparable status as independent group leader. The following external supervisors have already been approved by the Gruppenleiterversammlung (GLV) of the Biozentrum. New supervisors need that approval (see below for details).

External supervisors can supervise more than one Master student upon approval of the Teaching Committee of the Biozentrum (request via email to the committee head Prof. S. Hiller ([sebastian.hiller@unibas.ch](mailto:sebastian.hiller@unibas.ch)); the committee meets once a month).

### C. Application procedure for new external supervisors

The external supervisor (principle investigator, PI) submits an appropriate request to the GLV of the Biozentrum. The latest date for submission is 8 days before the GLV takes place. The application comprises:

- Online form «Learning Contract for Master's Thesis» fully completed in Part I, until and including the signature of the responsible secondary supervisor (Second assessor). The form can be downloaded here: <https://philnat.unibas.ch/de/studium/>
- Detailed project description (scope: 1 A4 page)
- Curriculum vitae of the PI
- List of publications of the PI

These documents are to be sent in electronic form to the responsible professor for the Master program in Molecular Biology, Prof. S. Hiller (email: [sebastian.hiller@unibas.ch](mailto:sebastian.hiller@unibas.ch)) with a copy to Susan Kaderli (email: [susan.kaderli@unibas.ch](mailto:susan.kaderli@unibas.ch)).

The application is considered at the next upcoming GLV meeting, which are usually held once a month.

Details of the study program can be found in the «Guidelines for the Study Program Master of Science in Molecular Biology at the Faculty of Science of the University of Basel» on the following page on the Internet: <https://bio.unibas.ch/de/reglemente/msc-molecular-biology/>.
