

Master Molecular Biology: Assessors, Second Assessors and Proctors

The Master thesis is performed under the supervision and responsibility of (i) a professor of the Biozentrum (Assessor: BZ Prof.) or (ii), a DBM or FMI group leader (Assessor: DBM or FMI group leader) or (iii), another supervisor external to the Biozentrum (Assessor: Others). In cases ii and iii, a professor of the Biozentrum is co-responsible for the Master thesis (Second assessor: BZ Prof.). The list of potential supervisors is available for download on the Internet: <https://bio.unibas.ch/de/studium/msc-molecular-biology>. Assessors that are not on this list require a confirmation by the GLV of the Biozentrum before the thesis can be started.

In case iii, the oral examination at the end of the thesis requires a second professor of the Biozentrum to be present, serving as a Proctor (Proctor: BZ Prof.).
